25X1

MEMORANDUM FOR: Chief, Procurement Division, OL

ATTENTION : Contract Administration and Settlement Branch, PD

THROUGH : Chief, Support Services

25X1A SUBJECT :

REFERENCE : (a) NPIC/TDS/D-1077-67 Memorandum Dated 16 October 1967
(b) NPIC/TDS/D-1179-67 Memorandum Dated 12 December 1967

1. The subject contract with [REDACTED] is for the design, fabrication, and delivery of four Fibre-Optic Stereoviewers Model 552A. The last viewer (552A-104) was accepted in reference (a) as of 16 October 1967; however, the contract specifies a 90-day warranty period associated with the equipment.

2. On 8 December 1967, it was discovered that certain deficiencies existed in the objective transport system which should be covered within this warranty. Specifically, when the transport was in the coupled mode, at the highest zoom setting, the ratio of the Y axis to X axis objective speed was approximately 3.5:1 when it should be 1:1. This deficiency was brought to the attention of the Procurement Division in reference (b) and the Contractor was promptly notified by PD.

3. Service personnel of the Contractor visited NPIC on 22 January 1968 and corrected the deficiency. This memorandum serves (1) to give notification of the completion of the work and (2) to record the date of the repair. It is NPIC's understanding that the period between breakdown and repair--46 days--will be deducted from the 90-day warranty period.
